

ACTAtek FP

Implementation Checklist

With purchase of your ACTAtek biometric access control system, you should receive the following:

- ACTAtek Unit - PRO (500 user) or CORP (3,000 user)
- Instructions CD
- Quick Installation Guide
- Crossover Network Cable (Black) [for connection DIRECTLY to PC/Notebook]
- Straight Network Cable (White) [for connection to network (hub/switch)]
- A 12V DC Switching Power Supply (Input: 100 - 240 VAC 50/60 Hz)
- Any accessories (embedded camera, IP camera, external relay, strikes/locks)

For proper implementation, please ensure you use the following checklist to ensure you have the appropriate items necessary to power, access, & protect your ACTAtek system:

- 12V DC electric door lock/strike (if not purchased from Axxis)
- Power supply for 12V DC electric door lock/strike (if not purchased from Axxis)
- Electrical outlet near ACTAtek unit
- Network interface/drop near ACTAtek unit
- We highly recommend purchasing a UPS unit to protect against power outage and surge

We thank you for your business. Please contact us toll-free at 1-877-AXXIS-01 if you require further support or information.
